Kigali, Rwanda

Dear Hiring Manager,

I am writing to express my interest in the software development opportunity at your organization. I am a motivated Full-Stack Developer with practical experience building web and mobile applications using JavaScript, React, Laravel, and related technologies. I am eager to bring my technical skills, problem-solving mindset, and willingness to learn to your development team.

Through my internships at Silve-Rwanda Ltd, Brave Tech, and PAC Rwanda, I gained hands-on experience working on software projects and developing full-stack applications. These experiences strengthened my ability to work with modern development tools, understand project requirements, solve technical problems, and collaborate as part of a team.

I am currently pursuing a Bachelor's degree in Computer & Software Engineering at the University of Rwanda. Alongside my academic studies, I continue to develop my skills through practical projects and continuous learning, with the goal of becoming a stronger and more well-rounded software developer.

I would welcome the opportunity to contribute to your organization while continuing to grow professionally. I am confident that my technical background, adaptability, and enthusiasm for software development would allow me to make a positive contribution to your team.

Thank you for taking the time to consider my application. I would appreciate the opportunity to discuss how my skills and experience could contribute to your organization.

Sincerely,

IKUNDABAYO Placide
